SUMMARY

Data Engineer, with 5.9+ years of experience in designing scalable ETL pipelines, distributed data processing systems, and cloud-based data platforms using Azure Databricks, PySpark, and Azure Data Factory. Experienced in building Delta Lake architectures, CDC pipelines, workflow orchestration, and performance optimization for enterprise-scale data. Skilled in Spark optimization, CI/CD automation, and cloud infrastructure management across Azure and AWS environments.

WORK EXPERIENCE

Data Engineer | ITC Infotech

Feb 2022 – Present

- Engineered scalable ETL pipelines using **Azure Data Factory** and **Azure Databricks**, processing large-scale of enterprise data daily and improving pipeline efficiency by **25%**
- Built distributed data transformation pipelines using **PySpark** and **Delta Lake**, reducing end-to-end processing time from **3 hours to 2 hours**
- Optimized Spark workloads using partitioning, caching, joins, and **Spark SQL**, improving query performance by **35%** for large-scale datasets containing **100 million records**
- Implemented **Medallion Architecture (Bronze, Silver, Gold)** using Delta Lake tables to support scalable analytics and reporting workloads across multiple business domains
- Designed incremental data loading frameworks using **CDC, watermarking, merge/upsert**, reducing redundant data processing by **40%**
- Orchestrated **20+ Databricks workflows** and scheduled ETL jobs for automated batch processing and SLA-based data delivery
- Developed event-driven workflows using **Azure Function Apps** and **Logic Apps**, reducing manual operational effort by **60%**
- Implemented CI/CD pipelines using **Azure DevOps**, reducing deployment effort from **2 hours to 20 minutes**
- Managed secure cloud infrastructure using **Azure Key Vault, Resource Groups, and Service Principals** for **10+ production data pipelines**

Python Developer | Centrox Solution

Aug 2020 – Feb 2022

- Developed and deployed Python-based backend services using **Flask** serving **5K+ monthly active users**
- Integrated REST APIs with **AWS RDS PostgreSQL** using SQLAlchemy, improving API response time by **30%**
- Built scalable file upload systems using **Amazon S3** capable of handling **10K+ file uploads per day**
- Deployed applications on **AWS EC2** using **Nginx** and **Gunicorn**, achieving **99.9% application uptime**
- Containerized applications using **Docker**, reducing environment setup time by **50%**
- Managed Linux-based production environments for deployment, monitoring, troubleshooting, and server maintenance

TECHNICAL SKILLS

- Programming:** Python, SQL, PySpark
- Cloud Platforms:** Azure, AWS
- Azure Services:** Azure Data Factory, Azure Databricks, Storage Accounts, Function Apps, Logic Apps, Key Vault, Resource Groups
- AWS Services:** EC2, S3, Lambda, IAM, CloudWatch, RDS
- DevOps & Tools:** Azure DevOps, Docker, Git, Linux, Postman, ServiceNow
- Databases:** SQL Server, MySQL, PostgreSQL
- Backend Development:** Flask, REST APIs

ACHIEVEMENTS & CERTIFICATIONS

- Best Performer Award, ITC Infotech (2024)
- Microsoft Certified: Azure Data Engineer Associate (DP-203) – In Progress
- HackerRank Python Certification

EDUCATION

Master in Computer Applications

2017 – 2020

Silicon University, Bhubaneswar
